Comment. The training activity at the training grounds which, prior to 31 May, had been limited by wood cutting was, according to this information, continued on a larger scale after 1 June.

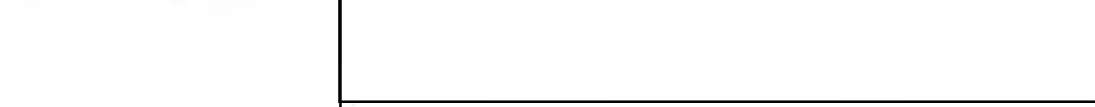

. The small groups of soldiers arriving

in early June are believed to have been recruits coming from the posts of the individual units. The presence of such small contingents of recruits was observed at several military post in East Germany.

the two AAA shipments observed on 8 June probably involved units of the 63d AAA Div which, judging from the light guns observed, presumably moved to Justen-

bog for firing practices.
